

SAN DIEGO AIR POLLUTION CONTROL DISTRICT

INSTRUCTIONS FOR FILLING OUT SOIL REMEDIATION APPLICATION SUPPLEMENTAL INFORMATION FORMS [Fee Schedule 52B]

The Site Assessment and Mitigation's Soil Remediation Workgroup, consisting of industry, SA/M and San Diego APCD representatives have together revised the supplemental form for soil remediation projects. The intent of the revisions is to clarify and simplify the District's soil remediation information form. Completing the revised form will help ensure that applications are processed in the most expeditious manner possible, since the information requested in the forms is typically all that is required for the District to process these applications.

INSTRUCTIONS

You need only fill out and submit those forms that are applicable to your specific application.

1. For **all projects** fill out **Form A**.
2. If the proposed project consists of the **treatment of previously excavated soils**, also fill out **Form B**.
3. If the project consists of the **treatment of contaminated soils "in-place"** (prior to excavation), also fill out **Form C**.
4. Forms D through F apply to different types of emission control equipment. Fill out the form(s) that applies to your proposed project as follows:
 - Form D** – Carbon Adsorbers
 - Form E** – Catalytic Oxidizers & Catalytic Converters
 - Form F** – Thermal Oxidizers & Internal Combustion Engines
