

FOR YOUR INFORMATION

The Following Notice was Published by the District

**NOTICE OF PROPOSED CHANGES TO TABLE I IN
RULE 1200 AND RULE 1210 OF REGULATION XII
SAN DIEGO COUNTY AIR POLLUTION
CONTROL DISTRICT RULES AND REGULATIONS**

The Air Pollution Control District is proposing to revise Table I in Rule 1200 - Toxic Air Contaminants – New Source Review and Rule 1210 - Toxic Air Contaminant Public Health Risks Public Notification and Risk Reduction to add the compound naphthalene. Table I in both rules is entitled “Toxic Air Contaminants For Which Potential Carcinogenic Impacts Must Be Calculated.” This revision means that potential carcinogenic risk from naphthalene air emissions will be considered in reviews of new, modified, and relocated sources emitting toxic air contaminants, as defined by Rule 1200. In addition, naphthalene will also be evaluated when determining public notification and risk reduction requirements pursuant to Rule 1210. Calculation of health effects for this air contaminant will be based on health standards recommended by the California Office of Environmental Health Hazard Assessment (OEHHA). Naphthalene (CAS Registry Number: 91-20-3) is a natural component of fuel oil and gasoline and is formed as a combustion byproduct. Combustion of these fuels is the primary emission source in San Diego County.

Written comments concerning the revision of these tables may be submitted for a period of 30 days, commencing September 29, 2004, and ending on October 28, 2004. Information concerning the proposed action may be obtained by writing to the Air Pollution Control District, 9150 Chesapeake Drive, San Diego California 92123, Attn: Air Toxics Section. Questions or comments regarding this notice may be directed to the District’s Air Toxics Section at (858) 650-4624.
